OUR CHALLENGE

Coral Reef Action Sustaining Communities Worldwide

We must act today to ensure the future of coral reefs and the communities that they sustain. We must work together to channel, coordinate, and build expertise, as well as community awareness and involvement, to save the world's coral reefs.

But we need your help...

With your support, ICRAN can expand its network to strengthen and sustain key activities to preserve coral reefs. With funding, ICRAN can ensure the sustainable financing of coral reef conservation through the recently established Coral Reef Fund (www.coralreeffund.org).

Join us in our fight to sustain healthy coral reefs and the communities worldwide that depend upon them for their livelihoods.
